

1. Shut off the power before installation.
2. Fix the mounting strap to ceiling.
3. Insert the bottom light arms into the round plate, fixing with washers and nuts. Put the round plate onto the wooden base and tighten with ball nuts securely.
4. Feed the main wire through the central body and nut with side hole. Screw threaded rod to the nut and then screw the nut to the central body.
5. Insert the upper light arms with wires into the cover plate, fixing with washers and nuts. Connect the wires to wires matching their colors and then connect the wire bundles with wire connectors to the corresponding main wire.
6. Install the cover plate onto the central body, tighten with ball nut securely.
7. Feed the main wire through the chain connectors and canopy. Screw the bottom chain connector onto the central body.
8. Connect the main wire with wire connectors to the corresponding wires in ceiling.
9. Attach the canopy to the mounting strap and screw top chain connector into the mounting rod, fixing with lock nut.
10. Hang the ball finial and wooden droplets to the light fixture.
11. Install the sleeves and screw in light bulbs (not included with the light fixture).
12. Turn on the power and test.
